

HEAVENOOO!

UNRIVALED CLEANER

SD Clean is an unprecedented cleaning agent that will remove organics, dirt, grease, grime, tar and mold from any hard surface: countertops, tables, sinks, toilets; high-touch items like phones, doorknobs and TV remotes, literally anything that gets dirty, gummy and needs cleaning. It has a pleasant, clean fragrance, a welcome change from harsh, caustic and malodorous solvents.

MORE THAN JUST A DETERGENT ✓

SD Clean's formula is specifically designed to weaken the chemical interaction that normally allows contaminant particles to "stick" to a surface, appearing as stains, dirt spots and discoloration.

Once these bonds are weakened, particle "release" is significantly enhanced, allowing for an overall cleaner surface. When needed, a gentle scrubbing can follow to rid what may still remain.

LESS TOXIC AND CORROSIVE ✓

Products on the high alkaline side often cause more harm than good as high pH products are customarily more toxic and corrosive, thus less safe to people and surfaces.

With a lower pH, SD Clean has a better safety profile for the user and better performance on surfaces.

A SUPERB PRE-TREATMENT ✓

SD Clean has been specifically formulated to be a pre-treatment for follow-up application with our disinfectant, SD VO, and coating product, SD 90.
